Signed cumulative budget: moving hydrogen
Pressure mismatch
Kinetic change
Density × sensible h
Density × formation h
Species + chemistry
Energy equation residual
Net assembled transport
History mismatch
Measured sum
Energy (mJ)
Time (μs)
Per-step accounting
Measured
Density sensible + formation
Kinetic
Energy per step (mJ)
Time (μs)
Terms after the energy solve
Pressure mismatch
Kinetic change
Cumulative energy (μJ)
Time (μs)
Small terms retained in the identity
Species + chemistry
Energy equation residual
Net assembled transport
History mismatch
Signed cumulative energy (J)
Time (μs)
